

Integrator Series AC Drives

AC690+ Series AC Drive

AC Drives 0.75kW - 1000kW

Description

The AC690+ Series is a single range of AC drives designed to meet the requirements of all variable speed applications from simple single motor speed control through to the most sophisticated integrated multi-drive systems.

The heart of the AC690+ is a highly advanced 32-bit microprocessor based motor control model. This provides an exceptional dynamic performance platform to which can be added a host of communications and control options, enabling you to tailor the drives to meet your exact requirements.

The AC690+ is available in 380-500V 3-phase 0.75 to 1000kW and 220V-240V 0.75 to 55kW.

Modes of Operation

The AC690+ can be user configured for 3 different modes of operation

Open-loop (volts/frequency) control

This mode is ideal for basic motor speed control, or multiple motors driven in parallel. The quick set-up menu and plain language display ensures the quickest and easiest, trouble free start up.

Sensorless vector control

High starting torque and tight speed regulation is provided by a sophisticated MRAS (Model Reference Adaptive System) motor control strategy. MRAS provides accurate speed simulation (without the need for any speed measuring transducer) by continually modelling the motor.

Closed-loop vector control

Full closed-loop flux vector performance can be achieved with the AC690+ by simply adding an encoder feedback 'technology box'. This provides 100% continuous full load standstill torque plus a highly dynamic speed loop (up to 45 Hz bandwidth); more than sufficient for the most demanding of applications.

Demanding Environments

For environments that have dusty, humid or corrosive atmospheres, the AC690+ can optionally be supplied with conformally coated circuit boards that improve the drives resistance to corrosion, thereby increasing reliability and service life.

Industries that would typically benefit from conformal coating could include:

- **Water and wastewater**
- **Paper and pulp processing**
- **Steel**
- **Marine and offshore**
- **Outdoor cranes**
- **Wind & wave power generation**
- **Food processing.**

Integrator Series AC Drive

AC690+ Series AC Drive

AC Drives 0.75kW - 1000kW

Features

Encoder feedback option with encoder technology box

The AC 690+ is converted from open-loop control to high performance closed-loop control by simply adding the plug-in encoder feedback technology box.

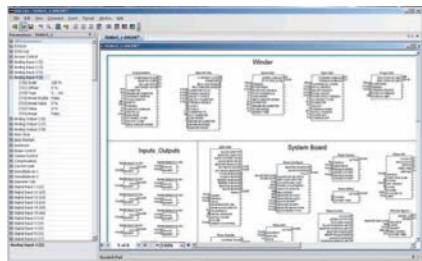

High performance systems expansion module

The optional add-on "systems" expansion module is available for more advanced applications and includes phase locking between drives and register control. It fits behind the main control board and provides the following functionality:

- 5 configurable digital Inputs / outputs
- Converts existing 4 analogue inputs to high resolution (12 bit plus sign)
- 2 encoder inputs
- 2 high speed register mark inputs

Integrated function blocks

- Winder Control
- Process PID,
- Raise / Lower
- Spinning Load Start

Open standard fieldbus communications

The AC690+ has a whole host of communication technology box options allowing seamless multi-vendor integration into networked systems using the most common industrial fieldbus communications protocols :

- Profibus-DP
- Ethernet
- Devicenet
- Modbus RTU
- CANopen,
- Controlnet
- Link (Parker SSD proprietary bus)

Mechanical protection options to suit all environments

A choice of mechanical protection options allows the drive to be mounted in a variety of different operating environments.

- **IP20** – for mounting inside an electrical enclosure.
- **IP40/NEMA 1** – The optional top cover, with cable gland plate enables the drive to be directly wall or machine mounted. (Frames B to E)
- **IP54** – Ideal for mounting in aggressive environments. Higher levels of protection are available as a special build option on request. A multitude of control options can be added to the drive using our FASTPACK option.
- **Through panel mounting** – This option allows the drive to be mounted with the major heat producing components and heatsink outside the enclosure, keeping the electronics clean and cool. (Frames C,D and E)

Programming / Operator controls

The AC690+ HMI provides access to all of the drive's functions in a logical and intuitive manner. The readout is backlit and displays all functions in plain language and engineering units. The HMI can be mounted on the drive itself, or alternatively it can be supplied loose, with a mounting kit, for mounting remotely on a panel door, for example.

Integrator Series AC Drive

AC690+ Integrator Series AC Drive

AC Drive 0.75kW - 1000kW

Vector control with / without encoder feedback

Power ratings 0.37 to 1000kW

Supplied in enclosure above 355kW

Pre-programmed application Macros

Programmable over communications

Programming identical to DC 590+ DC drive

Variable torque ratings

Class B EMC filters

AC690+ Series

Technical Specification

Power Supply	380-460V ($\pm 10\%$) 3-phase 0.75 to 1000kW ; 380-500V ($\pm 10\%$) 3-phase 2.2 to 110kW; 220-240V ($\pm 10\%$) 1-phase 0.37 to 2.2kW; 220-240V ($\pm 10\%$) 3-phase 0.37 to 37 kW.	Function Block Programming	Function block programming allows a tremendously flexible control structure to be created with ease. An almost infinite combination of user functions can be realised often alleviating the need for an external PLC. However, the drive is pre-configured so it can be used straight from the box as a standard AC drive without further adjustment.
Environment	Constant torque - 0-45°C (40°C with IP40 cover) derating possible up to 50°C max Max altitude: 1000m, derate by 1% for every 100m above 1000m	Analogue Functions	If So, summing, subtractor, multiplier, divider, if higher then lower then If, Counter, Timer
Overload	Constant torque: 150% for 60 seconds, 180% for 1 second; Variable torque - 115% for 10 seconds	Boolean Functions	Not, And, Nand, Or, Nor, Xor, Trigger, Flip-Flop
Output Frequency	0-480Hz	Application Macros	Simple speed control, Forward/Reverse, Raise/Lower, Process PID, Preset speeds, Winder control.
Switching Frequency	Frame B 3,6 or 9kHz; Frame C, D, E and F 3 or 6kHz - All with audibly silent switching frequency	6901 Operator Keypad	The 6901 keypad is designed for setting-up, configuring and operating the AC690+ drive. The intuitive menu navigation and parameter display is simple and easy to use. Main features: <ul style="list-style-type: none"> • Remote mounting capability on front of enclosure • Backlit display • Multilingual 2x16 alphanumeric display • Customizable display • Local Control : Speed setpoint, Start/Stop, Jog and Direction • Password protection • Quick set-up mode
Dynamic Braking	Each drive can be fitted with an internal dynamic brake switch Frame B and C : standard; Frame D,E and F : optional	Systems Expansion Module	The optional systems expansion module allows for advanced applications such as phase locking between drives and register control. Key features include: <ul style="list-style-type: none"> • 5 Additional user configurable Inputs / Outputs • 4 High resolution analogue inputs (12 bits plus sign) • 2 Additional encoder inputs • 2 High speed register mark inputs
Analogue Inputs	4 Configurable, 10bits (13 bits with optional system card). 0-10V, 0- \pm 10V, 0-20mA, 4-20mA		
Analogue Outputs	3 Configurable, 10 bits. 0-10V, 0- \pm 10V, 0-20mA, 4-20mA		
Digital Inputs	7 Configurable, nominal 24V dc (30V dc max)		
Digital Outputs	3 Configurable, relay contacts 3A/230 Vac		
Reference Supplies	+10V dc, -10V dc, +24V dc		
Motor Thermistor input			

Integrator Series AC Drive

AC690+ Series AC Drive
400kW - 1000kW

- Energy Saving**
- Fast return on investment in pump and fan applications**
- Improved power factor**
- Flux vector control with / without encoder and V/F control**
- Reduced harmonics through 12 or 18 pulse coupling**
- Improved HVAC control**

Standards

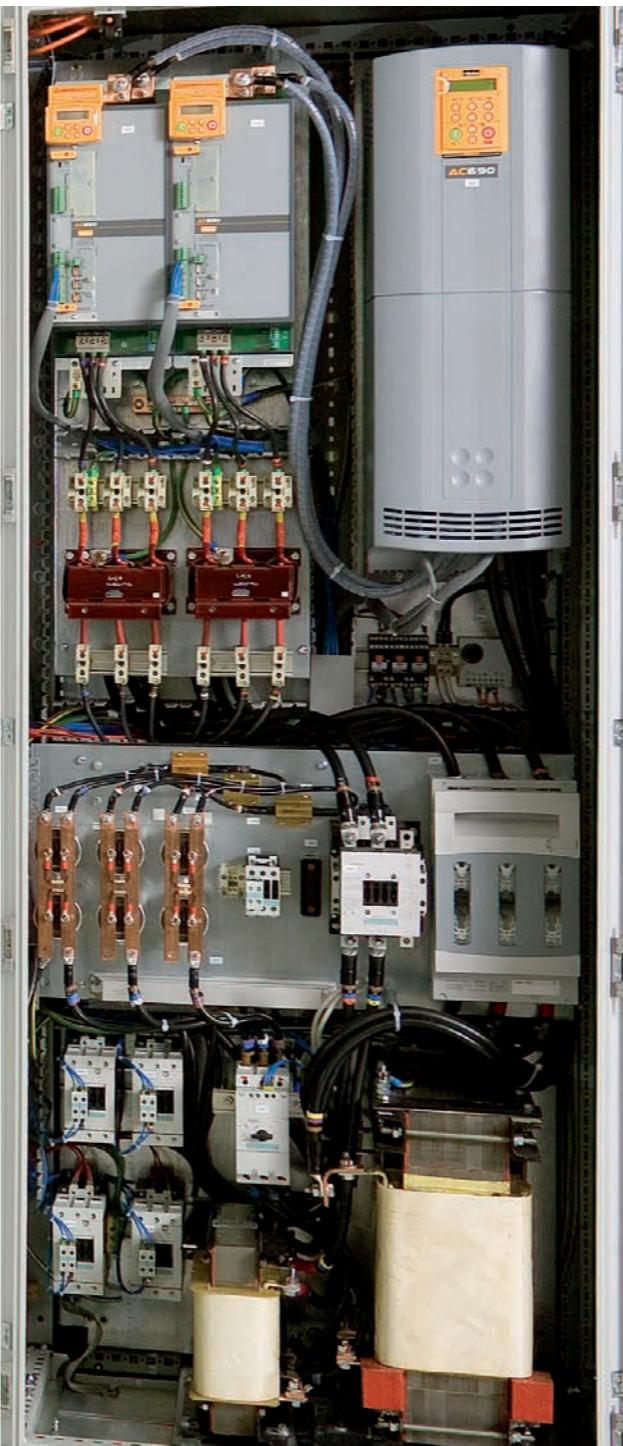

The AC690+ series meets the following standards when installed in accordance with the relevant product manual.

- CE Marked to EN50178 (Safety, Low Voltage Directive)
- CE Marked to EN61800-3 (EMC Directive)
- UL Listed to US safety standard UL508C.
- cUL Listed to Canadian standard C22.2 #14.

4 Quadrant Power Module

AC690+ Integrator Series AC Drive
AC Drives 0.75kW - 1000kW

Enclosure specifications

(above 355kW for constant torque)

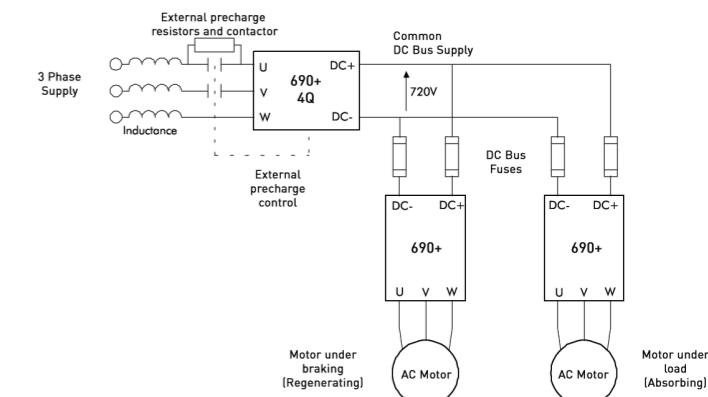

6 pulse Model	Power Rating	Constant torque : 355 - 900 kW Variable torque : 400 - 1000 kW
	Supply Voltage	380-460Vac ($\pm 10\%$) 3-phase
	Disconnect Switch	Standard
	Input inductance	Standard for limiting harmonic current
	Output Choke	Standard
	Operator Panel	6901 operator keypad mounted on enclosure door
12 pulse model (optional)	Harmonics	Reduced harmonic current
	Power Rating	Constant torque : 355 - 600 kW Variable torque : 400 - 650 kW
	Supply Voltage	380-460Vac ($\pm 10\%$) 3-phase
	Disconnect Switch	Standard
	Input Transformer	(not included in the enclosure) optional 2 secondaires U/D
	Output Choke	Standard
	Operator Panel	6901 operator keypad mounted on enclosure door
18 pulse model (option)	Harmonics	Total harmonic distortion (current) in accordance with limits of IEEE 519 (1992)
	Power Rating	Constant torque : 630 - 900 kW Variable torque : 750 - 1000 kW
	Supply Voltage	380-460Vac ($\pm 10\%$) 3-phase
	Disconnect Switch	Standard
	Input Transformer	(not included in the enclosure) optional 3 secondaires phase shifted by 20°
	Output Choke	Standard
	Operator Panel	6901 operator keypad mounted on enclosure door

Description

In many applications the overall power consumed by the system is less than the sum of power of the installed motors. Indeed, all sections of a machine do not consume energy at the same time. Typically, some motors will be driven electrically while others are being driven by the momentum of the machine.

For such applications, it is economically advantageous to connect the drives of all sections of the machine to a common DC bus: the energy-generating sections are then fed into the energy-consuming sections, which reduces the overall energy consumption of the system.

The drive AC690+ configured in 4 quadrant mode is the ideal solution to power such systems. Thanks to the 4Q functionality of the AC690+, the excess energy in the system is returned to the network and not dissipated in the form of heat through braking resistors. The current waveforms are almost sinusoidal, which minimizes network harmonics.

- Energy saving**
- No maintenance (No braking resistor)**
- Reducing the size of the supply required by distributing energy through the DC bus system**
- Reduced harmonics meeting the limits of IEEE 519**
- High power factor ($\cos \phi \sim 1$)**

Communication Cards

AC690+ Integrator Series AC Drive

The AC690+ Communication cards allow the AC690+ to be connected to the most common industry standard fieldbuses

Ethernet Communications Interface

*Order Code: 6053-ETH-00 and 6055-ETH-00

Supported Protocols	Modbus/TCP and Ethernet IP
Communication Speed	10/100M bits/s
Station Address	Selectable via switch or Internet Explorer
Suitable for	AC690+ version 4.7+ DC590+ version 7.1+

Devicenet Communications Interface

*Order Code: 6053-DNET-00 and 6055-DNET-00

Supported Protocols	DeviceNet Drive Profile Drive – Group 2 slave only
Station Address	Selectable via Software
Suitable for Drives	AC690+ DC590+ version 5.x+

CANopen Communications Interface

*Order Code: 6053-CAN-00 and 6055-CAN-00

Profile	DS402
Supported Messages	SDO, PDO, NMT, SYNC
Communication Speed	20K, 50K, 125K, 250K, 500K, 1M bits/s selectable
Station Address	Selectable via Switch
Suitable for	AC690+ DC590+ version 5.x+

RS485/Modbus Communications Interface

*Order Code: 6053-EI-00 and 6055-EI-00

Supported Protocols	Modbus RTU, EI Bisynch ASCII
Cabling	RS485 2 or 4 wire
Communication Speed	300 to 115200 bits/s
Station Address	Selectable via Software
Suitable for	AC690+ version 4.7+ DC590+ version 5.1+

* Refer to page 45 for details of drive frame compatibility

Features

- Communications cards can be factory fitted as part of the drive, or purchased separately for fitting on-site
- Dimensions H x W x D : 127mm x 76.2mm x 25.4mm
- LED indication of network and card status

ControlNet Communications Interface

*Order Code: 6053-CNET-00 and 6055-CNET-00

Supported Messages	Polled I/O
Station Address	Selectable via Software
Suitable for	AC690+ version 4.7+ DC590+ version 5.17+

Modbus Plus Communications Interface

*Order Code: 6053-MBP-00 and 6055-MBP-00

Supported Protocols	Modbus Plus
Cabling	RS485 2 or 4 wire
Communication Speed	1 M bits/s
Station Address	Selectable via Software

Profibus-DP Communications Interface

*Profibus-DP (6053-PROF-00 and 6055-PROF-00)

Supported Protocols	Profibus-DP
Communication Speed	Automatically Detected
Station Address	Selectable via Software
Suitable for	AC690+ version 1.x+ DC590+ version 5.x+

LonWorks

*Order Code: 6053-LON-00 and 6055-LON-00

Supported Protocols	LonWorks
Delivered	with a resource file compatible with LonMaker software (or equivalent)
Suitable for	AC690+ version 5.1+

Johnson Controls

*Order Code: 6053-JMET-00 and 6055-JMET-00

Supported Protocols	Johnson Controls N2
---------------------	---------------------

HTL Encoder Feedback Card

AC690+ Integrator Series AC Drive

Description

The HTL Encoder Feedback Card allows an incremental encoder to be connected to the AC690+ AC drive, allowing users to take full advantage of the integrated torque control and speed regulation functionality.

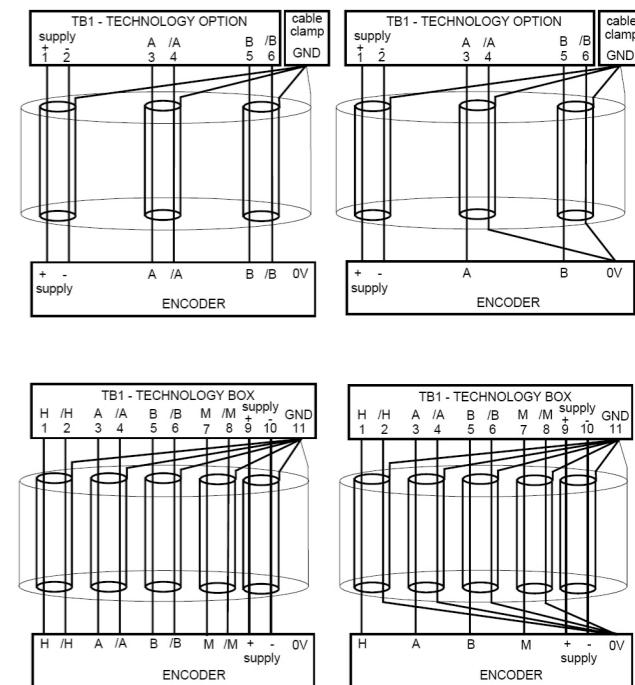

The HTL Encoder Feedback card has the following features:

- 4 Optically isolated differential inputs A, B, M and H
- Adjustable isolated 10 - 20V encoder power output

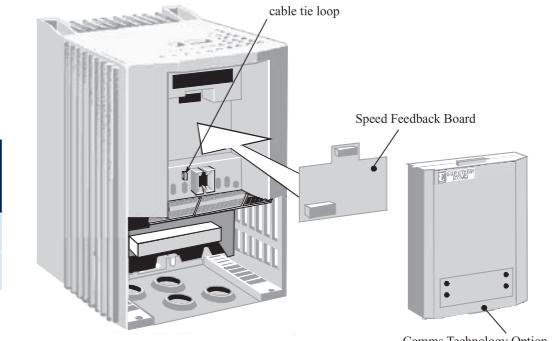

Specifications

Maximum Input Frequency	250kHz
Receiver current consumption	≤10mA per channel
Input Format	2-channels in quadrature, clock / direction, or clock only
De-phasing	>1μs
Differential Input Voltage	10 - 30V Maximum
Encoder Power	Maximum Load: Card AH467407U001: 200mA or 2W Housing 6054/HTL/00: 250mA or 2.5W Voltage 10-20V software adjustable.

Installation and cabling

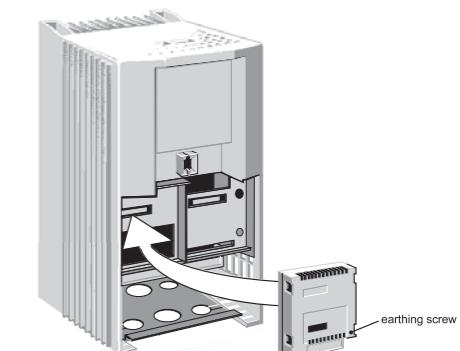

AC690+ Frame B AC Drives

Product Codes

Order Code	Drives
AH467407U001	AC690+ Frame B (690-xxxxxB...) drives
6054/HTL/00	AC690+ Frames C - K drives

AC690+ Frames C-K Drives

System Expansion Module

AC690+ Integrator Series AC Drive

Description

With the System expansion module, the AC690+ can be used in sophisticated applications, or where a small amount of automation is required to be used in conjunction with the drive.

The following features are available:

Analogue Inputs AIN1-4 are become high resolution (12 bit plus sign)

5 isolated I/O points, configurable as either inputs or outputs

Variable isolated output power for encoders

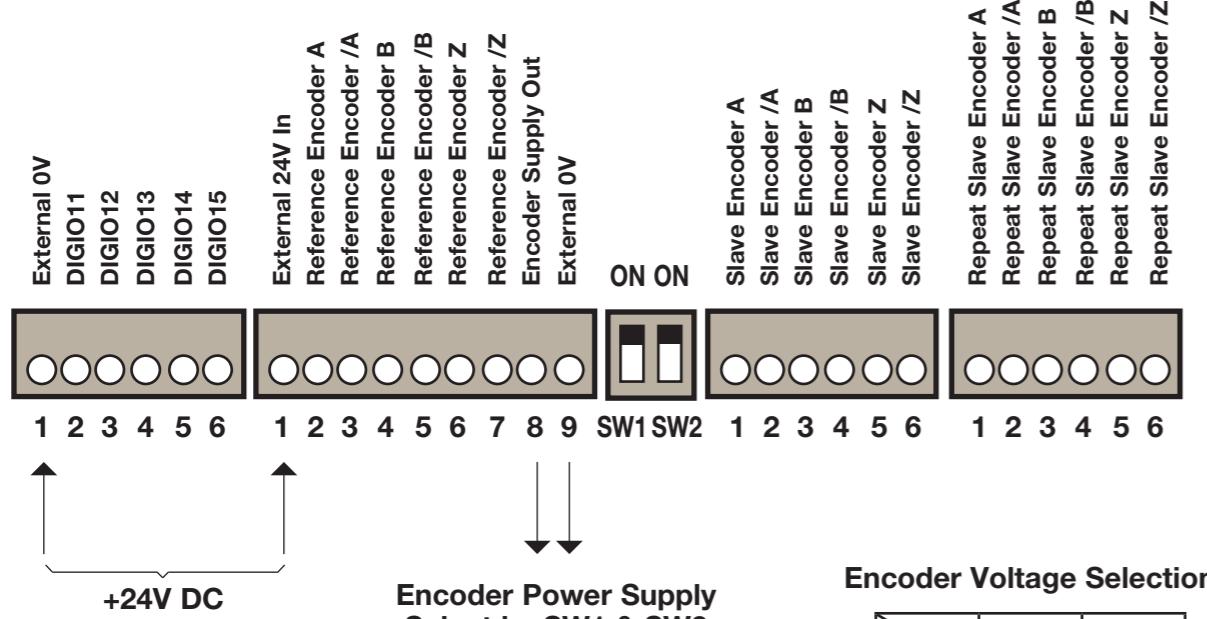

Master encoder inputs (Isolated HTTL): A, A/, B, B/, Z and Z/

Slave encoder inputs (Isolated HTTL): A, A/, B, B/, Z and Z/

Slave encoder output retransmission (Isolated HTTL): A, A/, B, B/, Z and Z/.

External Power Supply

An external 1A / 24Vdc($\pm 10\%$) must be connected to the card.

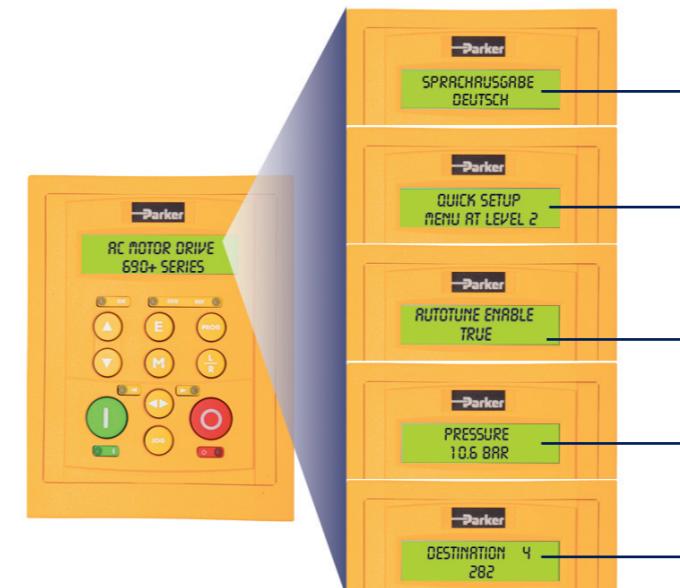

Operator Keypads

AC690+ Integrator Series AC Drive

Standard operator keypad 6901-00-G

Features

- Local motor control : start, speed, direction, diagnostics
- Operator menus and parameter configuration
- Quick setup menu
- Password protection for parameter configuration

Multilingual

English · French · German · Italian · Portuguese · Swedish · Polish

Quick setup menu

Intuitive menus allowing easy and quick setup of the drive

Auto-tuning

Automatic tuning of motor parameters ensures maximum dynamic motor performance

Diagnostics messages

Display input and output parameters as well as drive operating units

Drive configuration

Advanced operator keypad 6911-01-00-G

Features

- 128 x 64 pixels semi-graphical resolution
- RS232 and RS485 ports
- Recording of parameters to keypad and restore to drive (Memory card 256Mb to 2Gb)
