FEATURES

Event Log

TouchCenter conveniently displays the most recent actions involving system use. A press on the touch screen is all it takes to access the event log, letting users easily:
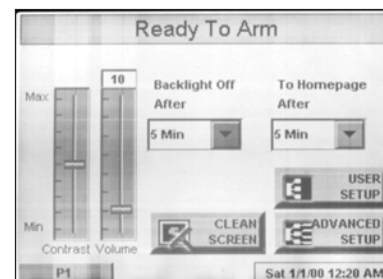

• View when the system was used and who used it

• Track when workers and temporary guests use the system

• Keep tabs on family members (e.g., checking if a child has armed the system upon returning home from school)

• Utilize the TouchCenter as an effective business management tool (e.g., viewing openings and closings)

Keypad

• Emulation of standard 2x16 alpha LCD keypad display

• Diagnostics allows testing of:

 – LCD display – Audio – LED indicators
